Window and door technology

Glazing blocks are the one and only connection between window and wall. On the one hand it enables perfect functionality of the window, on the other hand it keeps the window glass in place during its entire lifetime. This is important to avoid glass fraction. Eventually, these blocks determine the stability of the entire façade.

Roto Glazing blocks offer the most reliable and highest quality on long term and is confirmed by tests by the Rosenheim institute. Roto offers a variety of over 200 different types of glazing blocks. Therefore, Roto provides a perfect solution for all your needs.

QUALITY & INNOVATION ON SHOW FROM REHAU

With a number of exciting new product launches, a stand buzzing with 'white coated' experts and an oxygen bar which was one of the talking points of the show, it was hardly surprising that REHAU's stand was one of the busiest at FIT!

Themed around REHAU's scientific expertise, the stand focused on REHAU's strengths in polymer development and product design and included the first showing of a flush fitting casement window in REHAU TOTAL70, the launch of multi-chamber profiles in the sculptured REHAU TOTAL70S system and a new range of profiles for composite door frames which allow for the inclusion of a top light.

At the show, REHAU announced an agreement to supply the new profiles to Door Stop, and Door Stop's Sales and Marketing Director Patrick Dean said: "This profile ticks every box for us – it looks great, it's got the flexibility we need in terms of transoms for top lights and it's available in a complete range of colours. We think our customers will love its looks and appreciate the inherent quality which comes from REHAU."

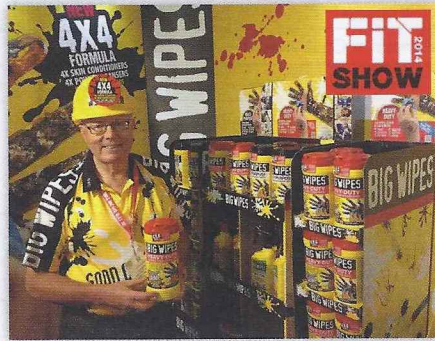

REHAU has already booked for 2016.

BIG WIPES CLEANS UP AT FIT SHOW 2014

Wiping their way into the hearts of many at this year's FIT Show, industrial wipes specialist BIG WIPES proved to be a visitor favourite with one of the Show's busiest stands.

There wasn't a moment when Brand Ambassador David Hawkins and the BIG WIPES team were not surrounded by a sea of interested parties keen to get their hands on the latest products from the Sycamore UK Ltd brand. With

demonstrations aplenty and friendly faces always on hand to answer any questions that might have been asked, they were by far one of the most popular exhibitors at the fabricator and installer trade show.

'demonstrations aplenty and friendly faces'

The brightly coloured stand was easy to spot as were the team, whose feel-good approach earned them many quality leads and new fans. The team was constantly demonstrating the company's products providing a powerful lesson about how to make an exhibition stand work, drawing in visitors, engaging them and easily gaining interest in the products.

Sycamore UK Ltd is the UK market leading industrial wipes specialist.

BUSINESS MICROS REDEEM THEMSELVES AT FIT SHOW 2014 FOOTBALL TOURNAMENT

While the question was shirts or skins when four football teams from the industry gathered at Telford United's New Bucks Head stadium for the FIT Show football tournament, public decency won as everyone chose shirts.

Four teams, two playing with a man short, came together on June 9th - the night before the FIT Show - to entertain the watching public at Telford's Goalzone centre with six keenly contested and often tasty games. Business Micros, remembering their thrashing at the hands of GQAs Rest of the World team in 2013, were eventually proclaimed the winners.

Jim Cronie (Business Micros) and Simon Smith (GQA PM Training) were nominated as top goalkeepers.

With GQA, GT Windows, Vita Cellular Foams, Business Micros and Haffner all fielding players, thanks also needs to be given to the timekeepers who did exactly that without stepping onto the hallowed 3G turf.

With one eye on April 2016 for the next FIT football tournament, keep your other eye on this space as Mick, Carl and Will discuss the potential for a FIT Show friendly in 2015.
