XT saw from Bahco ideal for use on site

Bahco have completed their 244 hand saw range by adding the 244P-XT, a universal saw with a blue, 22" blade ideal for use by plumbers and installers on building sites or in other locations. With unique XT toothing and hardpoint teeth for long lasting sharpness, the 'Blue 44' will make short work of cutting any coarse or thick wood, wet or dry, faster and with less effort. Its high tech blade, which remains super sharp despite repeated use, has a rust preventing, low friction coating to provide all weather protection. The saw's 'power grip' handle can be used for approximate 45 or 90 degree marking and delivers maximum energy in comfort and safety. Visit www.bahco.com to see the full range.

The Sit Tight toilet seat

From Croydex

The Sit Tight toilet seat is a pioneering design from bathroom accessories specialist Croy-dex - using a glue and screw fixing system to secure its hinges into place.

There is nothing worse than sitting on a wobbly toilet seat. The Sit Tight range is designed to finally deal with this annoyingly common but age old problem, whilst blending into any bathroom.

The Sit Tight toilet seat is incredibly straightforward to fit - by simply positioning the hinges and glue them into place before 'double-fixing' as tightly as possible with screws. Once secured into place, the seat can be used straight away - so people can just fit and forget.

Sit Tight gives peace of mind that the toilet seat will never come loose but can still be re-moved easily. Seats come in a choice of finishes including the Hygiene 'N' Clean anti-bacterial treatment; soft close; and Rainforest Alliance Certified ranges.

Big Wipes 4x4 Industrial Strength Wipes

When you're out on a job, cleaning up your hands and tools should be the least of your worries but can often be an almighty pain - particularly when there's no water available. That's where Big Wipes 4x4 range of industrial strength wipes come in. Being a plumber or heating and ventilation installer is often dirty work. You can't avoid grime when ripping out a kitchen and silicone might be perfect for sealing baths but it's nasty stuff when it gets on your skin

and can be tough to remove from tools. Big Wipes can quickly eradicate silicone, adhesives, sealants, oil, PU foam and general grime - without the need for water. They contain four powerful cleaning agents and four dermatologically tested skin conditioners, making Big Wipes 4x4 cleaning wipes even tougher on grime and even kinder to your hands. For more information about Big Wipes visit www.bigwipes.com.

Sprint eVo range from Anton

Anton leading suppliers of quality, affordable hand held instrumentation to the HVAC market, plays a dedicated role in ensuring support to the engineer with their Sprint eVo range ticking all the boxes. As you have come to expect from Anton innovation is at the forefront of their portfolio, and the successful launch at PHEX+ of their Free smart new App for Bluetooth communication with the Sprint eVo3 flue gas analyser, provides the heating engineer with instant wireless reports from

your FGA to your mobile device. Sprint Mobile includes Gas Rate, Pipe Size, Energy Conversion and Ventilation Calculators and allows Bluetooth communication between the Sprint eVo3 analyser and an Android phone or tablet, providing the heating engineer the option to create instant PDF reports which can be emailed from your mobile device / tablet direct to your customer. They can be even more personalised with your company details and even your Gas Safe Register number.

New concentrated inhibitor gives improved system protection

From Kamco

Power flushing specialists Kamco have introduced SYSTEMSAFE-DM Concentrate, a double strength corrosion inhibitor, passivator, and conditioner for heating systems. The compact 500ml pack size takes less van and shelf space, and has been re-formulated to give even better performance than one litre packs. SYSTEMSAFE-DM is a balanced blend of corrosion and scale inhibitors that has passed the Buildcert/DWTA performance classification required by Building Regulations. It gives complete protection against corrosion, sludge and scale formation in heating systems, preventing internal pitting and galvanic corrosion which leads to pin-hole corrosion and leaks. The formation of black iron oxide sludge, which accumulates in low flow areas to give flow problems and cold spots on radiators, is prevented. Systemsafe-DM Concentrate is simply added to the heating system and quickly disperses, extending the life of a heating system whilst maintaining operational efficiency. It may be used with all metals commonly used in heating systems, including steel, cast iron, brass, copper, and aluminium, and a 500ml pack is sufficient to treat a system with up to 12 radiators.
