**FESTOOL**

Festool develops, produces and markets top-quality electrical tools inclusive of comprehensive system accessories and materials for professional painters and decorators. This starts with powerful tools, then the appropriate accessories (e.g. the sanding pad) and the consumables like the abrasives – all developed especially for the tools. And because working professionally also means working in an orderly manner, there is an individual matching transport SYSTAINER for every tool as well as the mobile dust extractor that can be used wherever work that is dust-free and non-hazardous to health is to be carried out.

**NATIONAL PAINTING & DECORATING SHOW - STAND 16**

Sycamore UK's established Big Wipes range – the only industrial wipes to be dermatologically tested and to comply with the very latest EU Cosmetic Standard – is already the leading decorators trade brand having gained a reputation for fast and effective removal of paint, sealants, fillers and general grime from hands tools and surfaces.

Now available with a dual sided blue 'scrub' fabric for 100% faster grime removal and upgraded anti-bacterial cleaning action, the new 'Red top' Big Industrial + Wipes have been laboratory proven to kill 99.68% of MRSA, C.Dif, Listeria, Staphylococcus, E. coli 157 and Salmonella – making them ideally suited to cleaning hands before a lunch or tea break, especially where on-site washing facilities are limited. Available from all branches of DDC in Scotland. For further information, stockist and trade enquiries please see www.bigwipes.com.

**ZINSSER**

Zinsser will be showcasing its comprehensive range of fast drying, easy to apply speciality paints and primer-sealers and shellac-based clear finishes together with a selection of wall paper removal products.

Just launched Brosteel Ultra 60 ( from Zinsser's sister company Bollom ), a coating that gives a one-hour fire resistance in just two coats to structural steel, will be seen for the first time at the show.

The product eliminates the possible confusion facing the contractor and merchant when they have an intumescent project to complete: Brosteel 60 simplifies the process as no identification of steel profiles is necessary. The only information required is the total amount of square metres to be coated. Products from the Blackfriars, Solignum, Ratcliffe's and Ardenbrite ranges will also be shown.

**LEYLAND 'GET ON WITH IT' AT THE NATIONAL PAINTING & DECORATING SHOW**

Leading paint brand Leyland Trade is set to bring a touch of glamour to this year's National Painting & Decorating show in the shape of the very shapely Leyland Lovelies.

Taking place on November 11th and 12th at Coventry's Ricoh Arena, the event will also see the launch of Leyland's exciting new 'Get On With It' competition which aims to find the industry's favourite Leyland product as well as the face of Leyland Trade's 2009 advertising campaign.

Other activities taking place included a special master class to demonstrate the many benefits of the Truguard exterior range. Visitors can have their photo taken with the Leyland Lovelies, which will then be available to download from the website and will have a chance to take a closer look at Leyland's new and improved colour card as well as finding out more about the big plans that are in store for the brand. What's more, those that pre-register can also grab a goodie bag and Leyland Trade beanie hat!

Leyland Trade will be exhibiting on Stand 49. To register for a ticket, please visit www.paintshow.com. For more information on the Leyland range, please visit www.leylandtrade.com

**Important Tips for Selecting Airless Equipment**

**Look for Tip & Output Ratings @ Spray Pressure, not "Maximum Output"**

Some pumps are rated for output and tip size at intermittent duty, or rated for maximum volume of output at less than true operating spray pressures. Make sure that when you compare performance levels, you get ratings made during continuous duty at the minimum pressure for spraying water-based paint (minimum 2000 psi).

**Select a Pump one Tip Size Larger than You Spray With**

Make sure the model you select can support at least one tip size larger than the one you need in case you need to finish a job with a worn tip. Keep in mind that some heavier materials you may not spray regularly might require larger tips for atomization.

**Make Sure Both Upper and Lower Packings are Externally Adjustable**

Not available from competitors. Packing adjustment on SL and LP pumps keeps both sets of packing tension properly adjusted for maximum packing life. If you can't compensate for both upper and lower packing wear, packing life will be much shorter, and leakage past the packings can damage the piston-substantially increasing the cost of repair work.

**Totally Enclosed Fan Motors (TEFC) - Safe & Reliable**

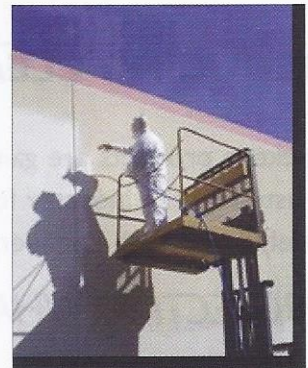

Be sure the motor itself has no openings for air to get inside. Internal exposure to paint or moisture shortens motor life and is a safety hazard. Some manufacturers have proclaimed "brushless" motors as an important technical breakthrough. These motors require sensitive electronic controls that have resulted in reliability issues. All Airlessco motors are covered by a LIFETIME GUARANTEE, a reflection of the durability our motors have demonstrated over the years.

**Maintenance Costs are Key to Cost of Ownership**

Airlessco pumps deliver more gallons between packing changes than competitors pumps of equal delivery. This reduces maintenance costs, downtime for maintenance, and cost of pick-up and delivery to the shop for repairs. Make sure the warranty protects you from costly repairs during the warranty period. If only limited coverage is offered, include the price of a piston and packing kit, and the cost of labour to install them, into your cost of ownership for the sprayer during the warranty period. This hidden maintenance cost can run into hundreds of Pounds!

**Proven Performance and Life for Contractor Use**

Some lower priced pumps advertise similar flow rates. Those manufacturers have reduced cost by sacrificing durability, component life, and the ability to stand up to every day use. We have tested pumps sold as "contractor models" that were worn out after spraying just 40 gallons of paint! Buying low cost equipment will ultimately cost much more for maintenance, repair, lost time, and replacement.
