

## THE NEW AND IMPROVED QUICKWASH

The new QuickWash2 from Bissell is a complete re-design of the company's original QuickWash. Featuring a six row cross-action brush it provides remarkable cleaning performance.

Enhancements in ease of use, tank management, on/off switch location and easy-clean-up after use features have all been incorporated into QuickWash2.

New styling with an eye-catching pearlescent finish has also been developed to make sure the QuickWash2 will stand out from the crowd. For further information, telephone Bissell on 0870 225 0109 or visit [www.bissell.com](http://www.bissell.com).

## CAR CARE KITS

Kent Chamois Company offers a full range of car care accessories and products. The car care offering includes 12 different sponges, seven types of stockinette, car wash brushes and sprays, polishing products and hoses with eight different connectors. Also available are gift packs

and valet kits, ideal for motor enthusiasts. Of course, the company also supplies a range of chamois leathers. Coming in six different grades, the first three – Super, Best and Campaign – are all available in bulk, polybags, corner tags or in gift packaging. The remaining three – Seamed, Patchwork and Tuff – range in size from one square foot to seven square feet. In total the company offers more than 80 combinations. For further information, telephone Kent Chamois Company on 01892 837 070.

## BEAT VANDALS WITH COO-VAR

Coo-Var has solved the graffiti problems of Hull-based retailer W. Boyes. Coo-Var's oil-based Anti-Graffiti Glaze (P101) is a hard, transparent coating, which can be readily applied to most surfaces and will resist most forms of graffiti from aerosols and marker pens. After one application users

attempt to deface walls by either using household detergent or using Coo-Var Graffiti Remover Liquid. Boyes Maintenance Manager, Brian Luke said: "We have used Anti-Graffiti Glaze at several of our sites. It works well on all surfaces, even floors." For further information, telephone Coo-Var on 01482 328 053 or visit [www.co-var.co.uk](http://www.co-var.co.uk).

## A CLEANING HEAVYWEIGHT

Ewbank, one of the best-loved names in household cleaning, is set to follow up the successful launch of the Breeze with the all-new LamiVac. This, the latest innovation from the Lancashire-based company, is a powerful cleaner working with both vacuum suction and an electrostatic cloth. It has been built to produce highly efficient cleaning on all types of hard floors. It follows in the Breeze's footsteps of portable, cordless, light and easy-to-use cleaners, which is earning the one time market leader a fresh new image thanks to backing from new owners Earlex. The eco-friendly cleaner, designed with economy in mind, costs just a penny to charge for 24 hours, which has delighted environmentalists. The fully manoeuvrable swivel head, long handle and lightweight body also make cleaning around the home or office effortless. Earlex Group Director, Colin Webber said the company was delighted to be launching another new product under one of the most enduring household brands in Britain: "We are very enthusiastic about the LamiVac. The rise in popularity of laminate flooring has meant that there has been a call for a specialist cleaner that will do the job

without causing the damage that other cleaners can. The LamiVac answers this call and following on from the success of the Breeze, we envisage LamiVac will set new standards in laminate floor cleaning. Virtually everyone knows the Ewbank name and it is great to be involved in bringing the brand back to life with this exciting new range. Our next model is currently in development and will be launched within the next quarter." For further information, telephone LamiVac ON 01282 835 841.

## CLEAN UP WITH BIG WIPES

Significant advances in on-the-job hygiene are coming in the shape of Big Industrial Wipes and dual-sided Industrial+ Big Wipes – two new ranges of anti-bacterial heavy-duty cleaning wipes for workshop personnel and tradesmen on the move. Both wipes remove oil and water based paints, instant grab adhesives, silicone and acrylic sealants, PU foam, oil, tar, grease, permanent marker and general grime from hands, tools and surfaces. Sycamore UK's established Big Wipes range – the only industrial wipes to be dermatologically tested and to comply with the European Cosmetic Standard – is already a leading trade brand having gained a Which? 'Best Buy' seal of approval for their ability to disperse a wide variety of stains and contaminants on different surfaces. Now with an additional anti-bacterial cleaning action, the new Big Industrial Wipes have been laboratory proven to kill 99.68% of Listeria, Staphylococcus, E.coli and Salmonella bacteria within 30 seconds – making them ideally suited to cleaning hands before a lunch or tea break, especially where on site-washing facilities are limited. The extremely strong 200mm x 300mm throw-away wipes are impregnated with a generous blend of safely diluted solvents and emulsifiers. Pleasantly perfumed, they

should retain their moistness and effectiveness for up to a year after opening thanks to a resealable airtight cap. Further extending its range, Sycamore has also announced a new deluxe dual-sided fabric under the Industrial+ Big Wipes brand. Soft and absorbent on one side, these wipes have a gently abrasive underside that makes them doubly effective in removing stubborn stains. For further information, telephone Sycamore Industrial on 01628 894 374 or visit [www.bigwipes.com](http://www.bigwipes.com).
