

Cordless platform

Stanley Tools is launching its brand new 18v cordless power tool platform allowing one interchangeable battery to be used across all FatMax tools in the 18v range.

The versatile platform includes eight cordless power tools, ranging from an impact driver to an oscillating tool and flashlight.

All products can be used with the same re-chargeable battery providing the ultimate convenience as well as exceptional value for money.

There are two Stanley FatMax 18v batteries to choose from; a 2.0Ah, suitable for light cutting, drilling and driving, while the 4.0Ah has a longer run time and provides the required power for heavy duty cutting and grinding.

HVP 265

The batteries offer fast charge times of one or two hours respectively.

The platform can be used by existing Stanley FatMax users, who can take advantage of the 'bare units', and those looking to create their tool kit from scratch can take advantage of the brand new starter kit which includes an 18v hammer drill, an 18v compact driver, two 18v 2.0Ah lithium-ion batteries, as well as a charger, encased within a storage bag to ensure kit is easy to transport and ready to deal with any task.

The new batteries from Stanley are compatible with all FatMax tools in the 18v range

Waterproof upgrade

Every Kamco Clearflow power flushing pump comes with a complete starter kit, with seven hoses and a selection of Kamco chemicals. Once a power flush has been carried out, the hose set – invariably still containing some water – has to be packed away in the van before job completion. Recognising that a van soaked with water is not ideal, Kamco now supplies every power flushing pump with a neat waterproof hose carry crate in which to store the hoses, with extra space for test equipment and other accessories.

The revised starter kit now contains the new concentrated packs of Hyper-Flush neutral pH flushing chemical, and SystemSafe-DM Buildcert approved corrosion inhibitor, as well as packs of the powerful 'one-shot' Power Flush FX2 flushing chemical, so that heating engineers

have everything they need to carry out their first two power flushes.

Engineers also get a 10-part BSP adapter set to enable connection of the pump into heating systems, and a pack of promotional leaflets for engineers to use to explain the

The Kamco Clearflow power flushing pump and starter kit

concept and benefits of power flushing to householders.

Also in the pack is a voucher for one free place on the Kamco power flushing training course, where engineers can learn enough to carry out a power flush quickly and effectively.

Pocket sized

Tradespeople can now take the power of Big Wipes wherever they go with new compact sachet packs of 40 wipes.

If you haven't got space to carry a tub, no worries: the sachet pack dimensions have been designed and specified to fit perfectly into the tool pouches of most leading brands of workwear, van glove boxes and toolbags.

However, just because they're compact, it doesn't mean you lose the size, because the Big Wipes in the new sachet packs are as big as their brothers in the popular yellow tubs (20cm x 30cm). The wipes stay just

as hydrated as they would in a tub, thanks to the self-adhesive quick seal, which stays sticky from the first to last wipe.

Big Wipes 4x4 shift all modern construction sealants, PU foam, adhesives, paints, coatings and grime. They contain four powerful cleaning agents and four dermatologically tested skin conditioners to nourish and protect the skin, making Big Wipes 4x4 cleaning wipes tougher on grime and kinder to your hands.

Big Wipes 4x4 products also offer >99.9% antibacterial protection and has been

Big Wipes now come in packs of 40

assessed to the latest EU Regulation 1223/2009 for cosmetic products, with zero levels of irritation recorded

during controlled testing by dermatologists. Furthermore, Big Wipes are 100% preservative-free.

The Big Wipes 4x4 sachet packs come in two varieties:

- Heavy-duty – The blue scrub and clean fabric offers thorough cleaning and additional 'wetting agents' to ensure the even distribution of liquid across the fabric. Textured and dual-sided, the scrub face of the wipe removes even the most stubborn grime, while the smooth face absorbs any excess
- Multi-purpose – A power fabric in a bright yellow colour, multi-purpose wipes combine strength and absorbency.
