

» Fein

Starlock Accessories

Inventor of the first-ever oscillating multi-tool, Fein has once again revolutionised the market with the introduction of the Starlock mounting system across its entire oscillating power tool range, enabling accessory changes in less than three seconds.

Featuring a new and patented press-fit tool mounting system developed in collaboration with Bosch called Starlock, the Fein MultiTalent, MultiMaster and SuperCut tools offer the fastest and easiest accessory change on the market. What's more, they also achieve increased work progress, reliability and precision when combined with the new Starlock accessories.

« Solid Gear

HYDRA GTX Safety Shoe

Solid Gear's HYDRA GTX is a highly technical safety shoe that integrates modern design with best-in-class materials for water protection, durability and a sporty look. Waterproof and breathable GORE-TEX lining keeps your feet dry and comfortable, while the Vibram outsole and Cordura ripstop fabric offer great protection and ruggedness.

What's more, the unique BOA Closure System – used on many top-brand sports shoes – distributes the pressure of the fastened shoe evenly across your feet to ensure a glove-like fit and all day maximum comfortable protection.

» Hitachi

CB18DBL 18V Band Saw

Hitachi Power Tools has launched the CB18DBL 18V Band Saw, featuring a brushless motor for greater power on-site and quicker cutting time than ever before.

The powerful Band Saw has been designed for ease of use and operator safety. The LED work light illuminates the blade edge or work material for use in dark areas, and the guide plate is adjustable from 20mm to 45mm to match the work material width. The 3.6kg of weight is evenly distributed with the battery and motor placed on opposite sides of the tool and the handle positioned near the centre of the gravity, reducing user fatigue and increasing control.

» Big Wipes

Abrasive Quad Fabric

Incorporating the latest high adhesion web technology, the all-new Abrasive Quad Fabric from Big Wipes grips 40% more grime with every wipe, so you can mop up even the toughest dirt in the quickest time.

So how does it work? The fibres of different denier grades are mixed in the layers: finer deniers for greater density and higher tensile strength, heavier deniers to break the smoothness and provide a rougher surface. This combination creates the unique texture of the fabric: soft and gentle, yet rough and durable. Dirt is hooked and held between the fibres and the powerful 4x4 formula dissolves dirt and grime.

VEX BOX The variable extension box

Should have used a Vex Box!

Vex Box is a variable extension box using a universal template to create up to 12 different extension boxes, either single or twin, providing a tidier and more efficient method of installation. Whether it's new builds or refurbishments, the surrounding wall can be finished to a superior standard, as the product extends the box flush with the plasterboard.
